

FERTILISER SPREADING SERVICES

864
SOILS FOR LIFE

864 Connect Agricultural Services offers a comprehensive contract fertiliser spreading service at competitive rates for all tree-crops, pastures and cropping as well as band spreading for under plastic mulch or row crops.

We can either supply and spread our specialty fertilisers

- Fine-milled Calcium and Gypsum
- Manufactured in Darwin
- Guano Gold and any granular fertiliser

OR

Spread your own supplied fertilisers – broad-cast, under-tree or band spreading. Accuracy is assured using tractor mounted GPS guidance for precise delivery and spread quantity accuracy.

Our new machinery is extremely robust, with the reduced width dimensions and a compact design, we deliver a spreading machine that easily navigates between the tight spaces between vines and trees. Spread your choice of materials across your orchard and crops, or distribute it evenly and accurately underneath low foliage, where it is most needed.

Side delivery attachment for under-tree fertiliser banding
